

AGS 7

ART. NO: 3631 | SHADOW REMOVER

AGS 7 is a thickened shadow remover with bleaching properties on pigment shadows from permanent markers and leather dyes. For use on both interior and exterior, porous surfaces.

AGS 7 effectively removes shadowing from most types of permanent marker and leather dyes. May also remove spray paint shadows. **AGS 7** may be used on most porous surfaces that withstand a bleaching effect such as concrete, brick, marble, sandstone, limestone etc. Please be aware of that **AGS 7** may affect metal surfaces. It is always recommended a test be made on a small part of the surface, especially on darker surfaces.

INSTRUCTIONS FOR USE

Apply a thick layer of **AGS 7** on the surface. To prevent drying out, cover with a plastic film. Suitable when long dwelling time is needed and on very absorbent surfaces. Dwelling time may vary from 4 hours to several days. Rinse with warm water and adjust the pressure to the surface. Repeat the process if there are any shadows left.

NB! DO NOT MIX WITH ACIDS. TOXIC GAS MAY BE FORMED.

Dosage

Use as concentrate.

Consumption

Approx. 1 litre/m².

Storage

Store frost-free in closed original container.

Shelf life

Approximately 6-9 months in unopened container.

Precautions

Use protective gloves, glasses and breathing mask in poorly ventilated areas.

Technical data

- Beige paste.
- Packaging: 5 litre coloured plastic jerricans.
- Density: 1,12 kg/litre.
- Chlorine odour.
- Contains Sodium hypochlorite.

Marking

Danger

Causes severe skin burns and eye damage. Very toxic to aquatic life with long lasting effects.

Classified as dangerous goods according to ADR.

UN 1791, HYPOCHLORITE SOLUTION

Class: 8 PG: II
